

Ninth Annual Lee White Innovation Institute

KEEPING SCORE! Innovations in Sports Medicine

Just about everybody loves or plays sports – or used to – or has children who do. We start as kids and compete to higher levels in school. A few continue in college and the elite go pro. We gravitate to recreational sports as we get older. Some persist, more slowly, into old age. At some point we get injured. Rehab is tough; obesity is an aggravator; and injuries risk mental and emotional well-being. Preventing injuries and getting injured “players” back to full functionality takes a coordinated clinical team effort and best practice medical, coaching and training techniques. This program will explore pioneering ways in which sports medicine is transforming the prevention and treatment of, and recovery from, sports-related injuries from the different perspectives of an outstanding faculty: A nationally-prominent Surgeon who treats elite pro athletes; an Orthopedist who directs a pediatric hospital’s sports medicine program; an athlete/coach/parent; and a Ph.D sports psychologist.
